5           GLEND A SEIBERT: My name is Glenda Seibert,  
6 S-E-I-B-E-R-T. And I'm just here as a concerned citizen  
7 also. And I feel that this does need to be taken care  
8 of.

9           It's -- I think that the nuclear waste is a  
10 lot more -- or poses much more danger being above ground  
11 than it does being buried somewhere. I think it needs to  
12 be taken care of. And I think that if we decide to put  
13 it at Yucca Mountain, that maybe it can be used as  
14 something that will bring more revenue to our state.
